All competitors must make provision in their cars for the installation of the Safety Tracking System. All further details will be given together with the device. Safety and tracking device and information sticker must be installed in the competition car in accordance with layout in Appendix 4. Competitor is responsible for installation of the device and fastening the sticker.

Organiser's representatives will check proper installation of the device on Friday, October 8, 2021 starting from 17:00 in TC0. Competition cars not equipped with the GPS monitoring device will not be allowed to start. Any attempt to tamper with, to manipulate or to interfere with the tracking device fitted to the competition car or any device that hinders the tracking recording by external interference will be reported to the Stewards who may impose a penalty up to exclusion. GPS units will be disassembled from the rally cars by the crew and returned at the entrance of Parc Fermé after finish (TC15) on October 09, 2021 at 19:15-22:00.

In case of retirement, the GPS device has to be returned to the GPS system provider. On October 09, 2021 the device may be returned to HQ before 19:00.

### **11.2 PRINCIPLES ON SECURITY AND TRACKING**

Security and tracking devices are connected to a monitoring centre that stores all data received. All data is also stored on the device itself. The device has "SOS" and "OK" buttons.

Each device has a unique serial number that is assigned to each crew. During the event the Rally HQ will monitor the location and speed of each crew.

### 11.3 "SOS" AND "OK" SIGNALLING PRINCIPLES

By pressing the "SOS" button a crew reports an accident and requests immediate assistance.

In case of an accident or technical problems at a Special Stage, by pressing the "OK" button a crew informs of stopping for more than 30 seconds and that immediate assistance is not required (even if a crew is trying to continue the rally).

Attention! In case of stopping at SS, the device automatically sends an "SOS" signal to the centre. If no assistance is required, the crew must press the "OK" button within 30 seconds to remove the "SOS" signal sent by the system. The crew's mobile phone must be switched on (or turned on within 60 seconds), so that the Race Control can reach the crew.

Incorrect "SOS" and "OK" signal transmission will be penalised.

**In the case of an accident where urgent medical attention is required, when possible the red „SOS“ sign should be immediately displayed to the following cars (General Prescriptions art 53.3.1)!**
